Supraja-tangella

Summary

Results-driven **Full Stack .NET Developer with 8+ years of experience** in C#, .Net Core, ASP.Net, Microservices, CI/CD, SQL Server, Azure & AWS. Skilled in implementing Microservices. Experience with both enterprise & startup companies. Tech blogger sharing insights on LinkedIn.**Authorized to work in the UK(ILR, share Code: WDR 5M6 5R6).**

Key Skills

Languages: C#, .Net Core, ASP.Net, Microservices, Agile

Cloud: Azure, AWS DevOps, CI/CD, Azure API management, Azure Service Fabric, Azure Functions, Powershell

Soft Skills: Problem-solving, Analytical skills, Communication Skills, Interpersonal skills, Effective teamwork skills

Other Skills: Code Review, Mentor, Cross-functional collaboration, Refactoring Code, pair-programming

Education

M.Sc Computer Science, S.V.University

Jun. 2002 to Apr 2004

Professional Experience

Infosys Technologies, Software Engineer

- Implemented Efficient, high-speed, and scalable solutions and Microservices, using C# & SQL, deplyed the application in AWS, **reducing application load time by 70%.**
- Conducted 50+ peer reviews, ensuring 95% adherence to code quality standards and best practices, resulting in a 30% reduction in post-release defects.

Yokogawa Electric Asia Pte Ltd, Engineer II

- Enhanced legacy system architecture, **improving processing efficiency by 30%** and ensuring seamless data flow.
- Implemented security best practices in web applications, reducing vulnerabilities by 40% and ensuring 100% compliance with industry security standards.

Robert Walters, Client - Raffles Medical Group, Analyst

- Developed a claims management system and deployed the application in AWS, **reducing processing time by 30% and improving data accuracy.**
- Mentored junior developers in .NET technologies, resulting in a 40% reduction in training costs.

Emerio, Client - Mobile One, Software Engineer

- Developed high-speed projects from legacy system, deployed the application in Azure, improving service sign-up processing time by 25% for over 1,000 users daily.
- Integrated customer identity verification, enhancing data security and compliance with industry standards by 60%.

SIRIMANI DIGITAL SOLUTIONS LIMITED, Software Engineer

- Designed and implemented Web Apps using C# and SQL and deployed the application in Azure, ensuring security and performance optimization by 65%.
- Led code reviews and mentored junior developers, reducing defect rates by 25% and enhancing team productivity.

Bangalore, India Dec 2006 to Dec 2011

Singapore

Dec. 2011 to Oct 2012

Singapore Dec 2012 to Sep 2013

Singapore Nov 2013 to Sept. 2014

> UK, London Mar 2022 to Present

Projects eDestiny Application Dec 2006 A quote is the process through which an underwriter outlines the business terms they are willing to offer on a submission. On average, a submission can be evaluated multiple times, with some contracts re-assessed up to 3 times if they remain unbound. Bind is the process of issuing a temporary authorization for coverage, valid until the final certificate is provided. Approximately 70% of submissions proceed to binding after log and clearance, or after being evaluated. • Environment:C#, ASP.Net, SQL Server, Azure, CI/CD, Agile, VSS, AWS **CENTUM VP** Dec 2011 CENTUM VP, Yokogawa's latest Distributed Control System (DCS), supports up to 1,000 control loops and has been deployed in over 3,000 facilities worldwide to enhance operational reliability and efficiency. • Environment: Environment:C#, ASP.Net, SQL Server, Azure, CI/CD, Agile, TFS, AWS **CAS Application** Dec 2012 Developed a claims management system enabling admin users to process over 500 claims daily by verifying patient eligibility through NRIC numbers with Raffles Hospitals. • The system streamlined billing and diagnosis entry, automated cost calculations, and allowed admins to confirm, edit, view, and export claim details for submission, reducing processing time by 30%. • Environment:Environment:C#, ASP.Net, SQL Server, Azure, CI/CD, Agile, GIT, AWS **eDAS** Application Nov. 2013 Designed the eDAS web app to enable store assistants to sign up customers for new services, modify existing services, and access customer details, handling over 1,000 customer interactions daily. • Integrated a camera feature for document scanning, supporting seamless service signups, amendments, and activation of SIM cards or other identifiers, reducing processing time by 25%. • Environment: Environment:C#, ASP.Net, SQL Server, Azure, CI/CD, Agile, GIT, AWS Mar 2022

Task Management Application

- Developed a web application allowing over 500 users to create, assign, and track tasks in real-time, similar to tools like Trello or Asana.
- The app enables seamless collaboration on tasks, delivering instant updates and live changes, improving team productivity by 20%.
- Environment: Environment:C#, ASP.Net, SQL Server, Azure, CI/CD, Agile, GIT, AWS
